Vocabulary

Melting: to become or make something become liquid as a result of heating.

Tin: tin is a soft silver-white metal that is often mixed with other metals or used to cover them to prevent them from rusting.

Prehistory: the period of time in history before information was written down.

Renaissance Period: the period in Europe when people became interested in the ideas and culture of ancient Greece and Rome and used these influences in their own art, literature, etc.

Plagues: a rare but serious infection that could kill.

Enlightenment: knowledge about and understanding of something.

Hand Tools: tools held in the hand and operated without electricity or other power.
