- Benefits.
- Regulation.
- Controversy.
- Scientific Consensus.
- Exercises.

Vocabulary

Affiliated: connected with or controlled by a group or organisation.

Yield: (in this context) to supply or produce something positive such as a profit, an amount of food or information.

Spoilage: the process in which food or other substances stop being good enough to eat or use, or the waste produced in this process.

Herbicide: a chemical that is used to destroy plants, especially weeds.
