Vocabulary

Strides: (in this context) a step or stage in progress towards an aim.

Spool: a cylindrical device on which film, magnetic tape, thread, or other flexible materials can be wound; a reel.

A spool

Wire wound round the spool.

Peepshow: a sequence of pictures viewed through a lens or hole set into a box, formerly offered as a public entertainment.

Potato Starch: Potato starch is starch extracted from potatoes.

Starch: an odourless, tasteless white substance occurring widely in plant tissue and obtained chiefly from cereals and potatoes.
