ALBERT LEARNING

Who was Isaac Newton?

Isaac Newton (January 4, 1643 to March 31, 1727) was a physicist and mathematician who developed the principles of modern physics, including the laws of motion, and is credited as one of the great minds of the 17th century **Scientific Revolution.**

In 1687, he published his most acclaimed work, *Philosophiae Naturalis Principia Mathematica (Mathematical Principles of Natural Philosophy)*, which has been called the single most influential book on physics. In 1705, he was knighted by Queen Anne of England, making him Sir Isaac Newton.
