Vocabulary

Teleport: (In this context) (especially in science fiction) transport or be transported across space and distance instantly. For example: Life would be much easier if we could simply teleport ourselves instead of wasting time travelling.

Pod: (In this context) a detachable or self-contained unit on an aircraft, spacecraft, vehicle, or vessel, having a particular function. For example: Travelling in auto-driven pods will be the future of transportation.

Sleek: (Of an object) having an elegant, streamlined shape or design. For example: The design of the latest model is very sleek.

Levitation: the action of rising or causing something to rise and hover in the air, typically by means of supposed magical powers. For example: The most popular trick of all magicians is levitation.
