

CNG Can Be The Best Alternative For Petrol and Diesel

Vocabulary

Combustion: the process of burning something.

Compressed: (gas or oil) squeezed into a small space or container and is therefore at a higher pressure than normal. It is used especially as a source of power for machines.

Skyrocketing: (esp. of amounts) to rise extremely quickly.

Compelled: having to do something, because you are forced to or feel it is necessary.

Unwieldy: An unwieldy object is difficult to move or handle because it is heavy, large, or a strange shape.

Introduction

CNG or Compressed Natural Gas is a compressed form of natural gas and is substitute for petrol, diesel, or LPG. CNG is an environmentally clean alternative to the other fuels, and it is much safer than the rest in an event of a spill.

For several decades CNG is used as a popular choice for the public transportation like buses cars and auto rickshaws etc. and its usage is said to increase further . It is also synonymously known as "Green Fuel". With the prices of petrol and diesel **skyrocketing**, numerous consumers are turning to CNG as a preferred fuel choice.
