

FUNNY LAWS

People do strange things, therefore weird laws are written to help straighten them out.

Some of these bizarre laws almost seem like urban myths or too ridiculous to be real, yet odd as they are, they were created for a reason.

Some of these laws date back several hundred years and were never changed or eliminated and make a very little sense in today's world, but nonetheless these weird laws found all around world do exist.

It is illegal to wear high heels at important archaeological sites in Greece.
