What is Humour?

Humour is the tendency of experiences to provoke laughter and provide amusement. The term **derives** from the humoral medicine of the ancient Greeks, which taught that the balance of fluids in the human body, known as humours, controlled human health and emotion.

People of all ages and cultures respond to humour. Most people are able to experience humour — be amused, smile or laugh at something funny — and thus are considered to have a sense of humour. Humour can be used as a method to easily engage in social interaction by taking away that **awkward**, uncomfortable, or uneasy feeling of social interactions.
