Vocabulary

To max out, to reach a point at which no more improvement, profit, or benefit can occur; level off.

Eg.: In her last job she **maxed out** at \$25,000 a year.

Chops - expertise in a particular field or activity.

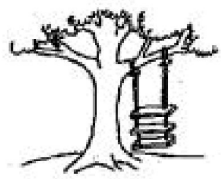

Eg.: You know, now we know where your talent comes from. So, go on, show me your chops.

Iterative - relating to or involving iteration, especially of a mathematical or computational process.

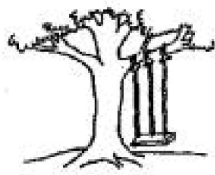

Agile - able to move quickly and easily.

Introduction

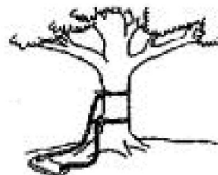

Software development is the process of conceiving, specifying, designing, programming, documenting, testing, and bug fixing involved in creating and maintaining applications, frameworks, or other **software** components.

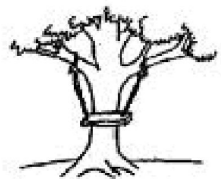

As proposed by the project sponsor.

As specified in the project request.

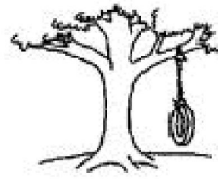

As designed by the senior architect.

As produced by the engineers.

As installed at the user's site.

What the customer really wanted.
