

Scientific Branches of Medicine

C1-C2

Module 8

Here's What We
Will Be Learning
in this
Presentation:

SUMMARY

- ☐ Introduction.
- ☐ Why Specialisation?
- ☐ Some of the Subspecialities of Internal Medicine.
- ☐ Exercises.

Vocabulary

Abreast: aware of or informed about.

Detrimental: harm or damage.

Musculoskeletal: relating to the muscles and skeleton and including bones, joints, tendons, and muscles.

Cellulite: fat in the human body, especially in the upper legs, that makes the surface of the skin appear lumpy (=not smooth).
