Leadership is a process by which an executive can direct, guide and influence the behavior and work of others towards accomplishment of specific goals in a given situation. Leadership is the ability of a manager to induce the subordinates to work with confidence and zeal.

But make no mistakes, being a leader is not being a boss.

Being a great leader means creating an inspiring vision of the future. It is someone who motivates people and points them into the right direction.

Leadership is about mapping out where you need to go to "win" as a team or an organization. It is about taking swift and decisive action, outperforming the competition.
